Looking After your Furniture

We've put together some helpful information to help you care for your bespoke furniture: -

- Our furniture range has been manufactured using the finest quality materials. These materials are not suitable for direct contact with water and so it is not suitable for use in a wet room environment or where it will be in direct contact with water.
- Bathroom furniture may deteriorate if exposed to high levels of condensation and all bathrooms must be adequately ventilated.
- To minimise risk of water damage we would suggest that the base of the cabinet and the back wall are sealed with a suitable sealant.
- When cleaning the furniture use warm water and a soft, damp cloth.
- Never use an abrasive cloth, chlorine, caustic acid or alkaline based cleaners when cleaning the furniture as this may damage the finish of the product.
- All liquids should be wiped dry from the furniture and wet items should not be left on the surface.
- To avoid damage in transit, our worktops are prefixed to the cabinets, once in situ we suggest you fix the two items together using suitable glue such as 'Tec 7'.
- Furniture should be installed by an experienced and competent installer, failure to do so will invalidate your warranty.
